

# THE OHIO JOURNAL OF SCIENCE — INDEX 1951-1970

JANE L. FORSYTH AND CHRISTINE M. GORTA

*Department of Geology, Bowling Green State University, Bowling Green, Ohio 43403*

## INTRODUCTION

It is almost 20 years since the first *General Index* to *The Ohio Journal of Science*, which covered the issues from the beginning (1900) through 1950, was published (Miller, E. M., 1953, published by The Ohio State University and The Ohio Academy of Science). It is time, therefore, for another general index, dealing with issues appearing since 1950. This is that index.

Unlike the first index, there is no separate listing of full references by author; rather, this is simply a combining of all the entries from all the yearly indexes from 1951 through 1972. Basically these original entries remain unchanged here, though mistakes found in a few were corrected, and some have been slightly reworded in order to fit better into this multiple listing. Entries relating to book reviews occur only for the years of 1963 through 1970, because book reviews were not included in the earlier indexes. It should also be noted that, though a few of these books represent merely a reprinting of older, out-of-date books, these books are not so identified in the entries in this index.

Preparation of this index has been mostly handled by Miss Christine M. Gorta, under the direction of Dr. Jane L. Forsyth, Editor of *The Ohio Journal of Science* from 1964 to 1973, but others have also contributed to this work—mainly Misses Lauran Boyles and Laura Witkowski—contributors whose efforts are gratefully acknowledged. Support for this index was supplied by the *Journal* itself.
